

Privacy Policy of phillipsalum.org
Phillips University Alumni and Friends Association (PUAFA)
August 19, 2026

Phillipsalum.org is a membership and memorabilia website which we use to enable members of the community to register for reunions, purchase memorabilia, maintain contact with alumni, and provide information about upcoming events.

We use software, including WordPress, Formidable Forms, WooCommerce, and several other plug-ins to provide the functionality and security required for www.phillipsalum.org. In addition, we use Google Drive and Google Sheets APIs to provide a means to interface between the data input forms on our website and Google Sheets. We do not fetch and process user information from Google. We (may) simply write information you provide in the forms you complete into a Google sheet so our board's committee can readily analyze the information you provide. Information you provide will not be shared with third parties for any purpose other than to enable the functioning of the phillipsalum.org and the events undertaken or endorsed by PUAFA.

We require strong passwords, use Captcha or similar code to ensure bots do not access our system and anti-spam features, and require members to have a more than passing knowledge of Phillips history to allow a member account to be created.

We will only share your personal information in the ways you instruct, e.g. if you indicate nothing is to be shared, that's what we'll do. If you indicate we may share or show your email address, that's what we'll do. The membership registration form provides you, the user, the options of what to share and with whom. The Terms and Conditions document restricts all parties – the user and the website owners – regarding what information on our website provided by a member can be shared and with whom.

This policy is work in progress. We are sharing it in this state because the membership features of the website are also works in progress.

This document will be updated as the new features are added. In the meantime, this will stand as the policy document.

Policy version 0.7
